SHREE SWAMI ATMANAND SARASWATI INSTITUTE OF TECHNOLOGY
INTEGRATED M.SC IT DEPARTMENT

INDEX

Subject Name & Code: Object oriented Programming in C++ (1320504)
Academic Year: 2025-2026
Term Duration: 17-12-2025 to 28-04-2026

Sr. No.	List of Experiment	Date	Page No.	Signature
1	Write a Program to print "Hello World!" in C++.			
2	Write a C++ program to display matrix multiplication table using nested for loop.			
3	Write a C++ Program to find both the largest and smallest number in an array list of integers.			
4	Write a program to find out number of even and odd out of array of size 10			
5	Write a C++ program to find the sum of the given variables using function with default arguments and without default arguments.			
6	Write a program to Swapping two variables value using call by value, call by reference and call by address.			
7	Write a C++ program to find average marks of three subjects of N students in a class using Structure.			
8	Write a C++ Program to Print Diamond Star Pattern. * * * * * * * * * * * * * * * *			
	Write a C++ Program to Print a Half-Pyramid Using Numbers 1 1 2 1 2 3 1 2 3 4 1 2 3 4 5			
	Write a C++ Program to Print Half-Pyramid Using Alphabets A B B C C C D D D D E E E E E			

9	Write a C++ Program to display array value using for each loop.			
10	Create a class named 'Student' with a string variable 'name' and an integer variable 'roll_no'. Assign the value of roll_no as '2' and that of name as "Ajay" by creating an object of the class Student.			
11	Write a program Illustrating Class Declarations, Definition, and Accessing Class Members.			
12	To write a program in C++ to prepare a student Record using classes with primitive data members.			
13	Write a C++ Program to implement class concept using a. Assign static value to data member of class b. Define private data member and public function c. Define getter and setter method of class. d. Store and display student eno, name, email, phone, sem information.			
14	Write a C++ program to display names, roll no and grades of 3 students who have appeared in examination. Declare the class of name, roll no and grade. Create an array of class objects .read and display the contents of array.			
15	Write a C++ program to illustrate an EMPLOYEE class contains following members: Data members: Employee number, Employee name, Basic, DA, IT, Net Salary and print data members. Write a C++ program to read the data of N employee and compute Net salary of each employee (DA=52% of Basic and Income Tax (IT) =30% of the gross salary).			
16	Write a C++ program to invoke Constructor and Destructor.			
17	Write a program to implement assign memory to object, count created for class and free memory of object.			
18	Program to illustrate default constructor, parameterized constructor and copy constructors.			
19	Write a C++ Program to implement default parameter constructor.			
20	Write a C++ Program to implement constructor overloading concept.			
21	Write a Program to implement static data member and static function.			
22	Write a C++ program to use this pointer and return pointer reference.			
23	Write a Program to illustrate New and Delete Keywords for dynamic memory allocation.			
24	Write a Program to Demonstrate the i) Operator Overloading. ii) Function Overloading.			
25	Write a C++ Program that illustrate multiple inheritance.			
26	Write a C++ Program that illustrate multi-level inheritance.			

27	Write a Program to implements 4 use of scope resolution operator. 1) Used to access the hidden variables or member functions of a program. 2) Defines the member function outside of the class. 3) Access the static variable and static function of a class. 4) Override function in the Inheritance.			

28	Write a Program to implements concept of Virtual Base Classes.			
29	Write a Program to implements concept of Pure Virtual Function.			
30	Write a Program to implements concept of Abstract Class.			
31	Write a C++ program use a try block to throw it and a catch block to handle for Division by Zero exception.			
32	Write a C++ program to write text in the file. Read the text from the file from end of file. Display the contents of the file in reverse order.			
33	Write a Program to Demonstrate Friend Function and Friend Class.			
34	Write a Program to implement write() and read() method of istream & ostream class.			
35	Write a Program to implement getline() method.			
36	Write a Program to implement put() and get() method of istream & ostream class.			
37	To write a C++ program for swapping two values using function templates.			
38	To write a C++ program to implement the concept of class template.
